

Evgenia Babulkova

About me

I'm Evgenia, a Frontend developer with background in UX/UI design, experienced in building scalable React + TypeScript applications. I'm interested in maintainable architecture, reusability and building tools that support thoughtful user decision-making.

Work Experience

Frontend Developer, intern & full-time - QAMPO ApS

Jun 2025 – Jan 2026

Built and maintained React + TypeScript features for **Pondoo's** home care visit planning software used by Danish municipalities to coordinate and optimize caregiver schedules.

- **Integrated new features** within complex system constraints and partial data flows. This included updating existing related code to optimize for **component reusability** and error prevention.
- Improved **design consistency** by unifying style variables used across the system and documenting the project's component tree using Storybook.
- Worked within an **evolving production system**, refining scope and implementation approach during development to reduce friction in user workflows
- **Collaborated** with designers, product managers and backend developers to translate requirements into scalable UI patterns

UX/UI designer, intern & part-time - QAMPO ApS

Jan 2024 – Jun 2025

Designed algorithm-based B2B planning solutions including KPI dashboards, interactive schedules and configuration pages for clients like **Bagstage** for Copenhagen Airport.

- Built and maintained a master design system spanning 5 products. This included tokenizing all products with the same base components. Additionally enabling light/dark mode and one-click brand color switching.
- Designed a research-driven pilot system consisting of manager software and user-facing app for staff rostering product.

Photography and graphic design - Freelance

2020 – 2024

- Photo and video editing software, Social media marketing, Graphic design.

Education

Web development - Business Academy Copenhagen

2024 – 2026

I gained technical experience in modern web development, focusing on building responsive full-stack applications on web and mobile.

- CRUD functionality and relational data modeling (React, TypeScript, NestJS, PostgreSQL).
- Implemented role-based authentication and structured state management.
- Applied accessibility and sustainable UX principles in development, focusing on energy-efficient design.
- Unit and end-to-end testing to support reliability of core functionality.

Multimedia design - Business Academy Aarhus

2022 – 2024

I got knowledge and skills within user experience (UX) and user interface (UI) design, digital content, basic programming and research.

- User-oriented design, UI and work with prototyping and development software.
- Collaborating with stakeholders due to the project-oriented curriculum.

Toolkit

Frontend

React, TypeScript, Next.js, React Native, JS, HTML5, CSS, Tailwind CSS, Redux Toolkit

Databases

PostgreSQL, MongoDB, Firebase

Backend

NestJS, TypeORM, Node.js and Express

Design

Figma for mobile and web interfaces

Other

Jest (Integration and E2E testing), Atlassian tools (Bitbucket, Jira), Git, Docker, WordPress

Skills

- Reusable frontend architecture
- Scrum
- User-centered design
- Interaction and visual design
- Collaboration with design and backend teams

Recommendation

Available upon request

Tanja Burke Jensen, Senior Frontend developer, Pondoo ApS
Ali Khatam, CEO, Qampo ApS

Languages

Bulgarian (Native proficiency)
English (Full professional proficiency)
Danish soon in progress

Hobbies

Photography
Volleyball
Music festivals
